The UN Migration Agency

Date. 27/04/2021

Bid Bulletin No 5
Supply and delivery of Medical Monitors and Pulse
Oxymeters
IFB No: 2021/MED/04/MO

Question 1:

The tender requires each bidder to offer all the products requested and not part thereof. Given that the companies in the market that can offer such an extensive portfolio are very few, if any, please clarify whether you can consider revising this specification, by splitting the tender in individual lots, i.e. one lot for each kind of product. This way, the competition will be more open, given that more companies will have the chance to offer their specialized products, of various technologies, whereas the Contracting Authority will benefit from better prices of products without any compromise of quality.

Answer 1:

Interested bidders should submit quotation for all required items (No.2 to No.5) as per revised Bidding Documents "(Revision No.1) Bidding Documents - Medical Monitors and Oxymeters_2021.MED.04.MO" and in accordance with the Addendum No.1. The selective/partial bidding is not allowed. However, Bidders may participate as members of a joint venture of two or more firms as partners. Kindly check Addendum No.2 which has been issued for this purpose.
